

Nexty

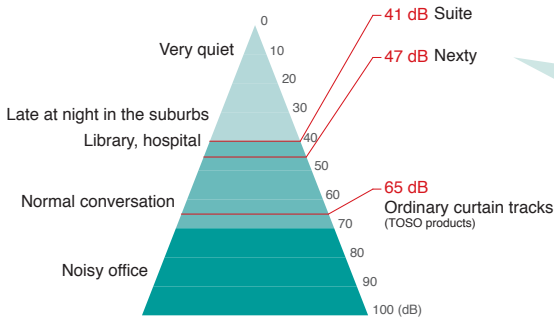

- Nexty—an advanced curtain track offering an outstanding combination of quality, functionality, and design features.
- A curtain track that emphasizes refined design in addition to easy installation and outstanding functionality.
- Rich color variation can choose the one which of match the interior design.

Nexty

Nexty's Unique Feature

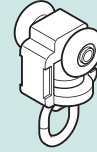

Smooth and quiet rollers

The key—
an **advanced roller function**

Noiseless Wheel-type Roller

Reduces the noise when opening and closing the curtain.

Nexty Roller

Simple Design

The Nexty curtain track also provides a neat appearance when installed inside a window frame.

Nexty Rollers give beautiful expression to curtain folds

Freely revolving eye bolts allow curtain folds to neatly settle into each other.

End Cap M— Curtain returns that excel by design

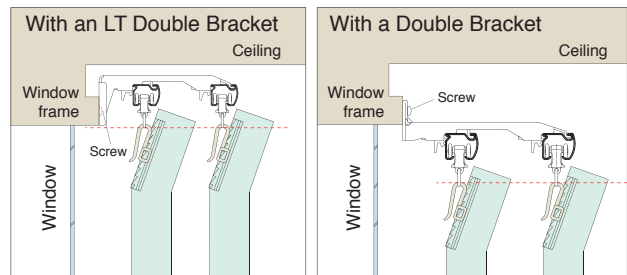

With the End Cap M design, the end cap is installed by inserting from the front. That means easy rail installation even right up against a wall or air conditioner.

*Rail must be installed 6 mm (.24") from the back wall.

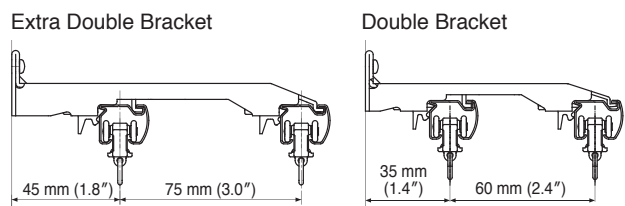

Return specifications include designs that shut out external light. Cap M come in two colors—silver and pearl beige.

LT Double Bracket

This bracket hangs the curtain higher than regular brackets. Because the top of the curtain is positioned higher than usual, very little light filters into the room. A screw hole is provided on the bottom of the bracket to enable easy installation on a window frame close to the ceiling.

Extra Double Bracket

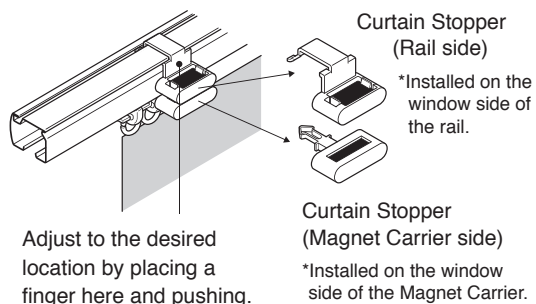

The Extra Double Bracket features wider spacing between rails. Additional space prevents interfering contact between curtain folds and window frame, and between the two sets of curtains.

Curtain Stopper (Option)

The Curtain Stopper (PAT.P) makes it possible to keep curtains open to their widest extent. Even curtains that tend to close because of the material of the curtain fabric.

*Ceiling attachment is impossible.

Side Magnet Carrier (Option)

The multi-magnet option makes it possible to open curtains from the sides, as well. This makes it possible to more conveniently open a sliding window or door. Side Magnet Carrier must be separately requested.

Return Aids (Option)

Return Aids do not require additional holes in walls and are also perfect for returns inside curtain boxes. If curtains are specified with Return Aids, this part must be installed on the caps.

Cover Top (Option)

Installing the Cover Top stops air flow and external light from above curtains and helps to lower heating and cooling bills.

Covers come in either light brown, dark brown or white.

Installing a Cover Top greatly reduces the amount of external light leaking in over the top and from around the sides of curtains.

*Cover Top lengths must be measured to leave 8 mm (.32") of space on the left and right sides to accommodate the left and right caps.

*Cover Top does not block all external light.
