

## Acuto

**Allowable Load: 5KG per curtain  
1KG per roller**

### Simple and Stylish appearance

Simple and Stylish appearance of Acuto provides new look. Acuto's head rail is so unique that it is flat, and roller runs hanging on one side. Combination of silver-stain components and Wood-like finish surface provides fresh look of decorative and functional curtain track.

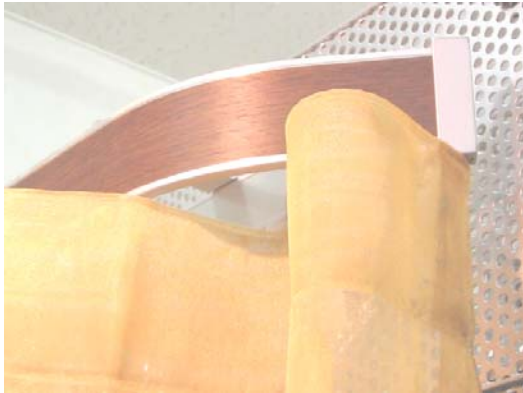

### Easy Bending

Acuto is so easy to bend and there is no need to bend before delivery. Acuto curve bender is available for convenient on-site bending. Curved rails are often problematic when transferring, however Acuto can be delivered and stocked along with portable benders, and can be measured and bent at installation site.

### Acuto Curve as Return

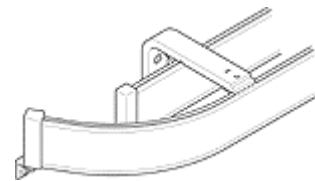

The most efficient feature Acuto has is its curved ends function as returns.

When curtains with return are made for ordinary curtain tracks, they require special sewn manufacturing. Acuto, however, can simply adopt regular sewn curtains and they would function just as returns.

**Acuto Return Curve Supporter:**  
to support the weight of curtain rail end.

### Component and Material

Component	Material	Finish
Rail	Aluminum	Olefin film wrapped
Cap A	ABS resin	Silver Satin
Cap B	Zinc die cast	Silver Satin
Bracket	Aluminum	Alumite

### Combination with Padina/Padina Twin LINE TOP STYLE

TOSO introduced Padina and Padina Twin LINE TOP STYLE, and those provide coordinating Acuto curtain track with roman shade within one room. LINE TOP STYLE has adopted Acuto rails as valance, and is option for customers to have coordinated curtain rails and roman blinds in one room.

For more information on Padina Line Top Style, Please see TOSO RS Catalog.
