If new balance rail is used.

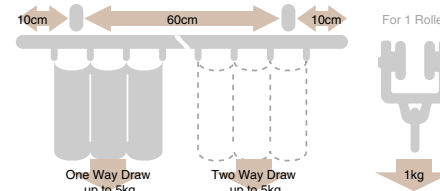

You can make curve simply with a bender.

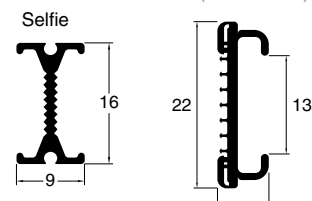

Please use Joint Pin for joint areas.

Easy Installation

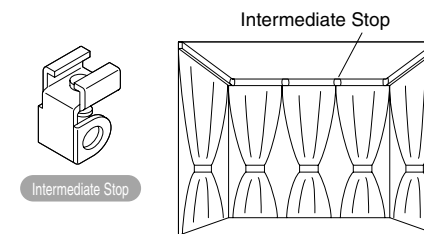

- The rail is vertically symmetrical and not direction-sensitive, resulting in easier installation.
- The horizontally, symmetrical I-shape makes the bend easy to undo.

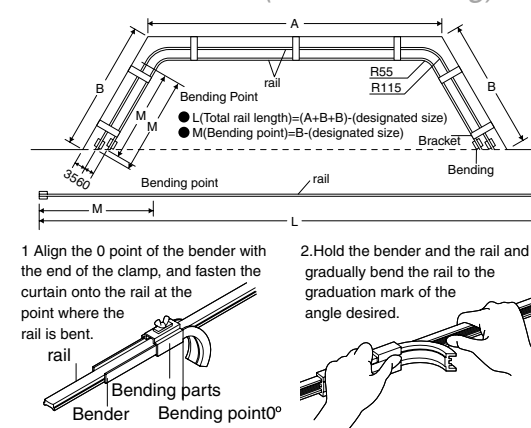

Bendable into Any Shape

Intermediate Stop for Stylish Window Treatment.

Basic Installation (Curve Bending) Method

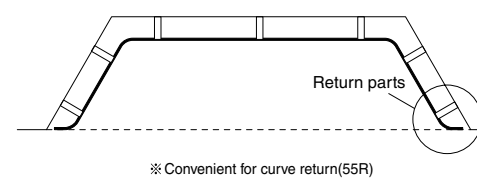

1. Align the 0 point of the bender with the end of the clamp, and fasten the curtain onto the rail at the point where the rail is bent.
2. Hold the bender and the rail and gradually bend the rail to the graduation mark of the angle desired.

Window Type	Bending Patterns	Formula	Bending Point

	Double Attachment	55mm in Radius	(A+B+B)-133mm	B- 72mm
		Outdoor side (115R)	(A+B+B)-138mm	B- 97mm
	Indoor side (55R)	(A+B+B)-352mm	B-157mm	

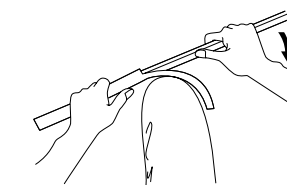

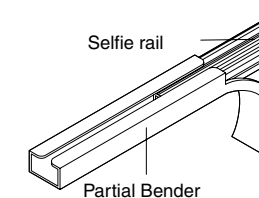

How to use Partial Bender

- Handy for bending both ends of a curved rail for a bay window only at a small angle. In this way a curtain return is created and light is not allowed to enter a room.

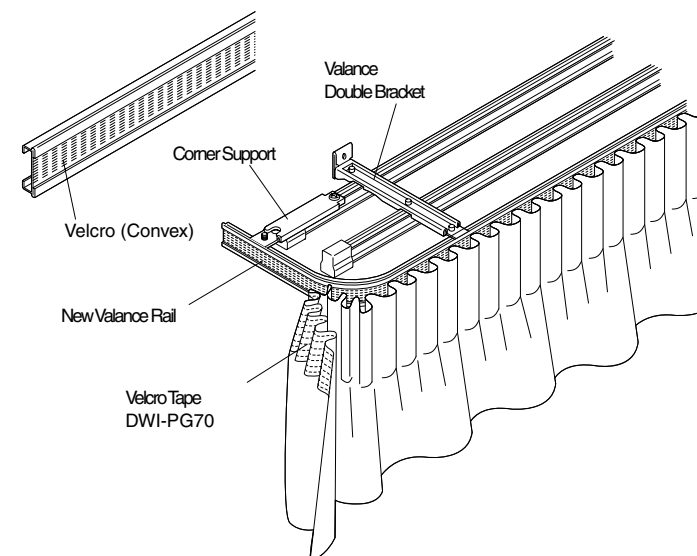

※ Convenient for curve return(55R)

1. Insert the end of rail to the bender.
2. Slowly bend the rail on your knee.

Cautions do not use the bender for other use.
