Roman Shade

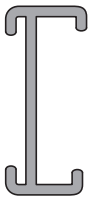
Freel

- Very simple and slim roman shade mechanism.
- Cord operation only, easy installation with universal brackets.
- Suitable for light fabric.
- A heart cam stopper enables smooth raising and lowering of the shade.

Freel

Freel's Unique Feature

The head rail, with its "I-shaped" cross-section, allows the shade to compress neatly when raised.

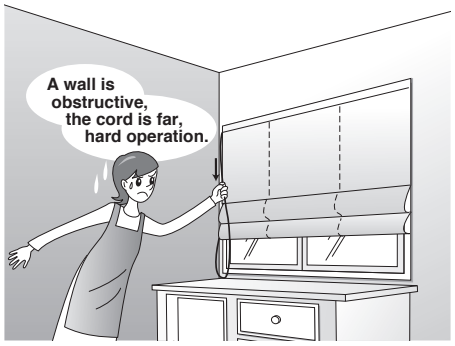


I-shaped
cross-section
of the Head Rail

Positioning of the stopper, cord guides, and other components behind the Head Rail preserves design integrity by ensuring they cannot be seen, even through a thin fabric.

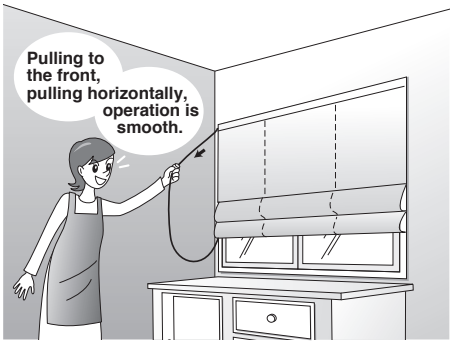
A heart cam stopper enables smooth raising and lowering of the shade.

Ordinary Roman Shades



Ordinary Roman Shades require the cord to be pulled straight down for operation.

Freel



Freel's heart cam stopper makes it possible to pull the cord at any angle for stop and release operation.

The ability to install the Lift Cord in the Cord Guide after assembly simplifies both assembly and maintenance.
