Magnet runner	1 pair	2 pairs
Single bracket	3 pcs	—
Double bracket	—	3 pcs
Mounting screw(pan head 3.5 x 20)	3 pcs	2 pcs

Elite/Single Set/Double Set

Installation

① We recommend that the track be approximately 10 to 20 cm longer than the window width, and that the distance from the end of the track to the nearest bracket be 10 cm or less. If the track is too long, cut it using a hacksaw.

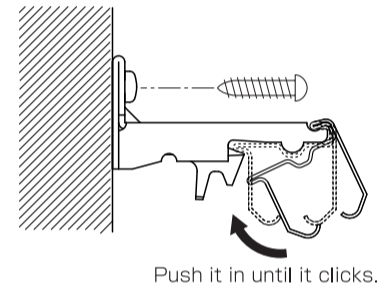

② Attach the required numbers of runners and magnet runners to the track. Fit the stop cap to each end of the track.

③ Mount the brackets on the wall or the window frame at regular intervals (within 90 cm).

⚠ Caution

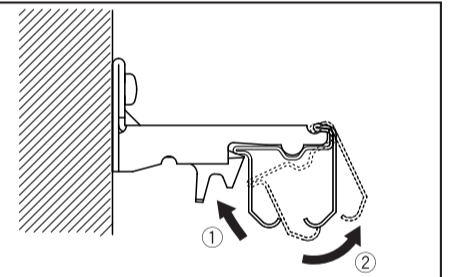

- ❗ When mounting the brackets on the wall, pre-check what kind of backing material is used.

④ Hang the groove of the track on the bracket. Push the track in until it clicks.

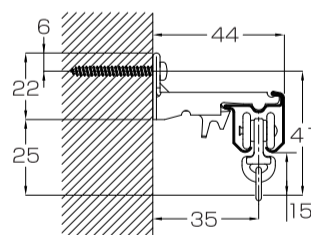

<Dismounting the Track>

- Push in the plastic part of the bracket pull it toward you as indicated in (1), then dismount the track as in (2).
