## Maintenance Sticker

- For preventive maintenance, a maintenance sticker attached to the underside of Bottom Rail. (When the slat size is 15 mm, attached to the underside of Head Rail.)
- With the bar code reader of your mobile phone, you can read a 2-dimensional bar code on the sticker and access our site to get the product information.
- Attention: you may not be able to read the bar code if the sticker gets dirty or damaged.

*When the product width is 470 mm or less, Tension Bracket is available only on one side. When the product width is 470 mm or less, Click mechanism is not built in. The product width is equal to the Slat one. Allowable width for fitting is the product (Slat) with plus 20 mm, at the maximum.*
**Installation Method**

**COLT BLIND 25 / COLT BLIND 25 for bathroom**

1. **Bracket installation**
   - Install the Bracket in a position 30–60 mm inward from each end of the Head Rail. If three or more Brackets are required, install the Bracket in between at equal intervals.
   - Fit the Bracket with accompanying screws.

2. **Installing the main unit**
   - With the Slats stacked-up, hang the front groove of the Head Rail on the temporal hook of each Bracket.
   - Push up until it securely clicks in.

3. **Removing the main unit**
   - With the Slats stacked-up, pull the Head Rail toward you while pressing the Bracket release button.
   - Remove the main unit from the temporal hook.

When fitting a Venetian Blind on a Curtain Track

Use the Curtain Track Fitting (option).

*Curtain Track Fitting (option)*

![Image](image.png)

*When this fitting, a venetian blind fits on a metal track such as a C-type track and a square-type track.*

**COLT BLIND 25 Tension for bathroom**

1. **Installing the main unit**
   - Remove stains, oil or waterdrops on a mounting surface to install and dry excess moisture.
   - Peel off the release paper of the double-sided tape on the Cap Plate and fit the Cap Plate evenly with the mark facing up.
   - While pushing the Support Plate, not on the operational side, into the Cap Plate, push the Support Plate on the operational side into the other Cap Plate for temporal fixing.
   - Rotate the dial on the operational side in the direction of arrow and adjust the gaps equally on both sides.
   - Rotate the dial opposite to the operational side in the direction of arrow until it is tightly fastened so that the product is securely fixed.

2. **Removing the main unit**
   - Pull the upper side of the Side Bracket Cover toward you to remove it from the Head Rail.
   - Fold the double-sided tape toward the blind and put the Side Bracket Cover on the Head Rail to cover the Support Plate and the Tension Cover.
   - To fit the Bracket Cover, put on the upper side of the cover, pressing the lower part against the projection on the bottom of the Head Rail.

Installation Method

![Image](image.png)

*Remove End Caps and Rollers from the curtain track.
*Hang the Curtain Track Fitting (option) temporarily on the Brackets.
*Slide them in the curtain track and then fix.

**Operation Method (One Control Type)**

**Lowering the blind**

With the Lift Cords in your hand, loosen the Cords by pulling down the Grip slightly to lower the blind.

**Lifting the blind**

With the Slats set horizontal, pull down the Lift Cords to raise the blind.

**Click mechanism**

When the Slats reach the top, the click mechanism will act with a "click" sound to keep them from returning. (It activates both on the room side and the window side.)

**How to use the Cord Hook**

Put the Lift Cords on the Cord Hook when the Slats are stacked-up.

**Ceiling mount inside the window frame**

Subtract approx. 10 mm from both the actual inner width and height of the window.

**Outside mount covering the window frame**

Specify the actual outside sizes, both width and height, for finished dimensions.

*COLT BLIND 25 Tension for bathroom can not the wall attachment.*

In case fitting the blind inside the curtain box (the Blind Box)

Subtract approx. 10 mm from the box inside width. Measure the height from the top of the box inside.

*Please note that the product height might have a certain margin of error.*

**How to Take Measurements**

*For the product size, specify to round down the nearest 10 mm.*

**Ceiling installation**

![Image](image.png)

**Wall installation**

Specify the actual outside sizes, both width and height, for finished dimensions.

*Be sure to specify the height from the top of the Bracket to the floor (head-rail-to-floor height).* Please note that the one-control wand length may be short unless specified.

Product Overview

Operation Method (One Control Type)

Lowering the blind
With the Lift Cords in your hand, loosen the Cords by pulling down the Grip slightly to lower the blind.

Lifting the blind
With the Slats set horizontal, pull down the Lift Cord to raise the blind.

Click mechanism
When the Slats reach the top, the click mechanism will act with a click sound to keep them from returning. It activates both on the room side and the window side.

How to use the Cord Hook
Put the Lift Cords on the Cord Hook when the Slats stacked-up.

How to Take Measurements

*For the product size, specify to round down the nearest 10 mm.

Installation Method

1. Bracket installation
   - Install the Bracket in a position 30–60 mm inward from each end of the Head Rail. If three or more Brackets are required, install the Bracket in between at equal intervals.
   - Fit the Bracket with accompanying screws.

2. Installing the main unit
   - With the Slats stacked-up, hang the front grooves of the Head Rail on the temporal hook of each Bracket.
   - Push up until it securely clicks in.

3. Removing the main unit
   - With the Slats stacked-up, pull the Head Rail toward you while pressing the Bracket release button.
   - Remove the main unit from the temporal hook.

When fitting a Venetian Blind on a Curtain Track

Use the Curtain Track Fitting (option).

With this fitting, a venetian blind fits on a metal track such as a C-type track and a square-type track.

How to fit a Venetian Blind on the Curtain Track

*With this fitting, a venetian blind fits on a metal track such as a C-type track and a square-type track.

Bracket Width

Install the Bracket in a position 30–60 mm inward from each end of the Head Rail.

Adjusting a Slat angle

Twist the Grip for fitting.

Click mechanism

When the Slats reach the top, the click mechanism will act with a click sound to keep them from returning. It activates both on the room side and the window side.

How to use the Cord Hook

Put the Lift Cords on the Cord Hook when the Slats stacked-up.

In case fitting the blind inside the curtain box (the Blind Box)

Subtract approx. 10 mm from both the actual inner width and height of the window.

Stoping the blind
Release your hand from the Grip and the blind will stop at that point.

Outside mount covering the window frame

Specify the actual outside sizes, both width and height, for finished dimensions.

Wall installation

Subtract approx. 10 mm from the box inside width.

Measure the height from the top of the box inside.

*Please note that the product height might have a certain margin of error.

*Be sure to specify the height from the top of the Bracket to the floor (head-rail-to-floor height).

Please note that the one-control wand length may be short unless specified.

How to Measure the Measurements

*Please note that the product height might have a certain margin of error.

1. Installing the main unit

   1. Remove slats, or on waterfalls on a mounting surface to install and dry excess moisture.
   2. Peel off the release paper of the double-sided tape on the Cap Plate and fit the Cap Plate evenly with the mark facing up.
   3. While pushing the Support Plate, not on the operational side, into the Cap Plate, push the Support Plate on the operational side into the other Cap Plate for temporal fixing.
   4. Rotate the dial on the operational side in the direction of arrow and adjust the gaps equally on both sides.
   5. Rotate the dial opposite to the operational side in the direction of arrow until it is tightly fastened so that the product is securely fixed.
   6. Pull the upper side of the Side Bracket Cover toward you to remove it from the Head Rail.
   7. Fold the double-sided tape toward the blind and put the Side Bracket Cover on the Head Rail to cover the Support Plate and the Tension Cover.
   8. Put the Side Bracket Cover on the upper side of the Cap Plate, pressing the lower part against the projection on the bottom of the Head Rail.

Operation Method (One-control Type)

2. Removing the main unit

   1. Pull the upper side of the Side Bracket Cover toward you to remove it from the Head Rail.
   2. Rotate each dial of both sides in the opposite direction of arrow to loosen.

Longing the blind

With the Lift Cords in your hand, loosen the Cords by pulling down the Grip slightly to lower the blind.

Stoping the blind

Release your hand from the Grip and the blind will stop at that point.

Adjusting a Slat angle

Twist the Grip for tilting.

**Installation Method**

1. **Bracket installation**
   - Install the Bracket in a position 30–60 mm inward from each end of the Head Rail. If three or more Brackets are required, install the Bracket in between at equal intervals.
   - With the Slats stacked-up, hang the front groove of the Head Rail on the temporary hook of each Bracket.
   - Push up until it securely clicks in.

2. **Installing the main unit**
   - With the Slats stacked-up, hang the front groove of the Head Rail on the temporary hook of each Bracket.
   - Push up until it securely clicks in.

3. **Removing the main unit**
   - With the Slats stacked-up, pull the Head Rail toward you while pressing the Bracket release button.
   - Remove the main unit from the floor hook.

4. **Installing Cable Guide Holder**
   - Install the Cable Guide Holders to make the cables at right angles.
   - For wall installation, install the Cable Guide Holders shown in the illustration.

5. **Stretching the Cable Guide**
   - Turn the hexagonal winding reel with a coin.
   - Winding with a coin gives enough tension. Note that excessive tension may cause a malfunction.

- **How to use the Cord Hook**
  - Put the Lift Cords on the Cord Hook when the Slats are stacked-up.

- **Click**
  - When fitting the product onto the window frame, use the attached Click mechanism at the front of the window frame (wall side).
How to Order

Choose your type of blinds.
- e.g.) NEW CERAMY 25

Specify your Slat number.
- e.g.) TB-100

Specify the dimensions (width and height) of the product in 10 millimeters.
- e.g.) Width: 1,000 mm, Height: 1,000 mm
*Please note that the product height might have a certain margin of error.

Specify the control position (right hand control or left hand control viewed from the room side).
- e.g.) Right hand control

Be sure to specify the height from the Bracket position to the floor.
- e.g.) 2,000 mm
*Please note that the one-control wand length may be short unless specified.

Specify the quantity.
- e.g.) 1 unit

Specify optional parts if necessary.
- e.g.) Curtain Track Fitting, 2 pieces

Option

Curtain Track Fitting
Use this when fitting a roller blind on a curtain track.
*With this fitting, a venetian blind fits on a metal track such as a C-type track and a square-type track.

Bracket Spacer
Use this when you need to clear the window frame for an outside mount.
Bracket Spacer 12
- 1 pc. (pan screw: 2 / 3.5 w 40)
- 2 pcs. (pan screw: 4 / 3.5 w 40)
- 3 pcs. (pan screw: 6 / 3.5 w 40)
Bracket Spacer 22
- 1 pc. (pan screw: 2 / 3.5 w 50)
- 2 pcs. (pan screw: 4 / 3.5 w 50)
- 3 pcs. (pan screw: 6 / 3.5 w 50)

Bottom Rail Stabilizer
A device to protect the blind from swaying in the wind when opening a window.

Installation Aid 11
Use this when unable to attach the Brackets to the window frame.

Curtain Track Fitting: we deliver the fitting free of charge if you specify it when ordering.

Curtain Track Fitting: we deliver the fitting free of charge if you specify it when ordering.

Left one spacer on the other before fitting.

One-control Wand Length
